

Optical Engineering

Oshino's mechanical, electrical and manufacturing design engineers are experts in the art of optical engineering. Using precision tools, they create light guide systems with masterful yet functional designs that enhance automobile interiors and safety. Sporty, fun, elegant or sophisticated, our highly specialized advanced color tuning engineers work with customers to achieve the desired light output, color and style. Let Oshino help you make the statement your vehicle should.

Applications

-  Console
-  Door panel/handle
-  Sidewall
-  Audio/Media backlighting
-  Logo/emblem embellishment
-  Pathway lighting

The Oshino Difference

-  In-house optical engineering
-  On-site custom mold design and manufacturing
-  100% process control beginning with raw materials procurement
-  Comprehensive technical, manufacturing and installation support
-  Designs per customer and industry specifications
